Title: Chronic pain therapy
Date: 9 November 2018 (11 am)

Principal Investigator

Full name: Maarten Moens
Research Group: Center for Neurosciences

Maarten Moens graduated from the VUB as a MD in 2002 and as a neurosurgeon in 2008 and obtained his PhD from the VUB and KUL in 2013. His research group works on functional neurosurgery, with a strong focus on chronic pain. Obtaining and characterizing objective measurement tools for chronic pain and unraveling mechanism of action in neuromodulation are the main foci.

Doctoral Candidate

Full name: Lisa Goudman

Lisa Goudman obtained her master in physiotherapy from the University of Ghent in 2014. While working in a private practice as a physiotherapist, she followed a postgraduate in Manual Therapy, in 2014-2015. In 2015, she started her PhD at the VUB under the supervision of Maarten Moens, Jo Nijs, Kelly Ickmans and Ronald Buyl. She is now doing research in the field of EEG responses and experimental pain measurements in patients with chronic low back pain.
